

Abstract of the Disclosure

A sounding device for showing its location on a sonar fish detector including a sonar wave receiving unit (10) to detect the sonar signal, a sonar wave producing unit (20) to simulate the reflection of the sonar wave from the fish, a control unit (30) to regulate the function of the wave receiving and producing units through on-off switches (12) and (22), and a power supply (40) to provide the electricity for the sounding device. The control unit may also receive command remotely from a sonar fish detector or a remote controller to turn on/off the sounding device as well as to perform other functions
